

EMS Ltd helps local recycling company win Investor in People

Creation Recycling Ltd is a not-for-profit community recycling initiative working in partnership with Rotherham Metropolitan Borough Council helping to boost household recycling rates in and around the Rotherham area and create sustainable jobs and opportunities for the local community.

Environmental Monitoring Solutions Ltd, a Dronfield based Environmental Consultancy & Training Centre, approached Creation Recycling in 2005 and offered to provide access to 100% funded level 2 National Vocational Qualifications (NVQs) in Environmental Conservation (Community Recycling).

Creation Recycling welcomed the opportunity to access such prestigious nationally recognised training. Tracey Pellegrine, company General Manager stated:

'...the courses offered by our previous training provider were wholly inappropriate to our business and not well received by our teams...the environmental NVQs provided by EMS Ltd are eminently better suited to our activities and have helped identify previously untapped potential in our work force'

Tracey added:

'...as a result of the success of the environmental NVQs provided by EMS Ltd, Creation Recycling has been awarded the Investor in People award and is now fully committed to the training and development of its personnel, with several staff about to progress to the level 3 NVQ offered by EMS Ltd...'

Peter Spink, training provider with EMS Ltd, commented:

'...the first NVQ 2 Environmental Conservation (Community Recycling) qualifications were awarded to Creation Recycling personnel late 2005 with several team members displaying such potential as to warrant progression to the level 3 NVQ ... the training was such a success that all future new starters at Creation Recycling are to receive the same environmental training...'

EMS Ltd is a certified training provider with Edexcel, City & Guilds and the Institute of Leadership & Management (ILM) and has access to government funding to provide level 2, 3 and 4 environmental NVQs to organisations throughout Yorkshire and Lancashire.
