What will I learn?

This course is designed to help learners understand what the environment is and why it is important to protect it. Topics covered include the different types of pollution, how pollution is caused and why it is important to prevent it. As they work through the modules learners will come to understand how reducing negative environmental impacts benefits our health and the economy. Finally, the course covers their legal responsibilities when dealing with waste and the consequences of ignoring them.

What topics are covered?

- What is the environment?
- What is pollution and what are the main types?
- The costs of pollution to our health, the economy and the environment
- Environmental aspects and their impacts
- Waste, air and water management Legal responsibilities when dealing with waste and the consequences of ignoring them

Benefits

- Flexible approach, where learners can complete the course at their own pace
- All delivered online, saving you money on travel, venue and material costs Interactive, engaging content that tests your knowledge
- No limit on how many employees can take the course
- Helps improve company environmental performance
