

Aqua TROLL® Multiparameter Sondes

These flexible instruments are ideal for spot checking and profiling when paired with a Wireless TROLL® Com and the VuSitu® app, and for continuous, remote monitoring when used with VuLink telemetry and HydroVu® data services. VuSitu automatically sends all data logs, calibration reports and other files to your HydroVu account for secure data access, storage and management, all in one place.

The Aqua TROLL 500 and 600 are five-port multiparameter sondes, including four sensor ports and a wiper port. The Aqua TROLL 700 and 800 are seven-port multiparameter sondes, including six sensor ports and a wiper port. There is an option to have an automatic antifouling wiper to ensure data accuracy.

All four sondes are available in vented and non-vented options and are compatible with the complete range of Aqua TROLL sensors.

SIMPLIFY DATA COLLECTION WITH EQUIPMENT DESIGNED TO BE RELIABLE, COST EFFECTIVE AND EASY TO USE.

AVAILABLE SENSORS:

- Rugged Dissolved Oxygen (RDO®)
- Temperature
- Conductivity
- pH/ORP
- Turbidity
- Chlorophyll a
- Phycocyanin (BGA-PC)
- Phycoerythrin (BGA-PE)
- FDOM
- Crude Oil
- Rhodamine WT
- Fluorescein WT
- Ammonium (ISE)
- Chloride (ISE)
- Nitrate (ISE)

APPLICATIONS

- LAKE, STREAM AND WETLAND MONITORING
- COASTAL DEPLOYMENTS
- STORMWATER MANAGEMENT
- DAM MONITORING
- LOW-FLOW GROUNDWATER SAMPLING
- REMEDIATION AND MINE WATER MONITORING
- SURFACE WATER SPOT SAMPLING AND
 PROFILING
- AQUACULTURE

RUGGED IN GROUNDWATER AND CORROSION RESISTANT IN SURFACE WATER AND MARINE ENVIRONMENTS, THE AQUA TROLL PORTFOLIO IS DESIGNED TO ADDRESS COMMON PROBLEMS WITH MULTIPARAMETER MONITORING INSTRUMENTATION. IT OFFERS

A SHARED ECOSYSTEM

Reduce complexity and cost with equipment that works together. All Aqua TROLL products use the same ecosystem—from handheld to cable to communication.

3D FACTORY CALIBRATION

In-Situ performs a multi-point factory calibration on every sensor, to ensure that the sensor is linear across its full range and simplify calibration for the user.

LOW-MAINTENANCE DEPLOYMENT

Keep labor and equipment costs down with advanced passive and active antifouling on all sensors and 6+ month battery life.

ENHANCED RELIABILITY

In-Situ equipment is designed to withstand use in the harshest environments. Features designed to prevent breakage or failure include:

- Interlocking sensors for greater stability
- Titanium restrictor
- Fully potted sensors
- Redundant SD card storage
- Multi-chamber design

BUILT-IN ERROR PREVENTION

Prevent the most common damage or loss with:

- Spring-loaded screws that keep screws in place
- Slip-clutch wiper to prevent motor damage
- Smart sensors that fit in any port
- Wet-mate connectors that prevent water damage
- Anti-roll bumpers to keep equipment stationary

MINI CALIBRATION CUP

These sondes use only 50 ml (Aqua TROLL 500/600) and 100 ml (Aqua TROLL 700/800) of solution for calibration, reducing calibration cost by 5x over traditional methods and saving thousands of dollars in calibration solution per year.

FAST-RESPONSE SENSORS

Aqua TROLL sensors were designed to support spot-checking and profiling applications where sensor response time is critical. The temperature sensor uses an extended thermistor and insulated barriers; RDO® has optional fast-response formulation; and a round bulb increases surface area and improves response time on the pH sensor.

UPGRADE FROM A 500 TO A 600 AND FROM A 700 TO AN 800 IF YOU NEED...

INTERNAL BATTERY POWER

Two Alkaline D-cell batteries provide internal power to the instrument for continuous deployment (6+ months depending on logging rates and wiper) without external power

- INTERNAL LOGGING Record data logs to internal memory of the sonde MICRO SD CARD
- FOR BACKUP LOGGING Record backup logs to the micro SD card for a second data source in case something happens to the onboard memory (flooded instrument, etc.) HIGHER MAXIMUM DEPLOYMENT DEPTH RATING Up
- to 100M with the Aqua TROLL 500, 200M with the Aqua TROLL 600 and 250M with the Aqua TROLL 700/800

NOTES: "Weight includes sonde, sensors, wiper, batteries (600 and 800 only), and bail. "For 30 parameters >100,000 data records, > 3 years at 15 min. interval. A single data record includes timestamp, temperature, RD0, pH, ORP, turbidity and conductivity logged in Linear or Linear Average mode. "Log data recorded to 5D card in comma delimited variable (CSV) file format. Greater than 32 GB not supported. "Logging all sensors at 15 min interval on 2 D Akadine batteries. Battery life dependent on site conditions and wiping. "Dependent on display and wiping." Typical system response with instrument, sensors and restrictor when changing approximately 15°C in moderate flow. "Response time at thermal equilibrium. "Accuracy from calibration standard @ 25C, response-at thermal equilibrium immediately following calibration measuring from air to +400 mV. "Accuracy at calibration points. "PDD sensor hill range 0-60 mg/L, 0-600% sat. EPA-approved method under the Alternate Test Procedure Process." "User-defined reference. "Between 2 calibration points immediately following proper conditioning and calibration. Varies on site conditions and environmental interferents. See sensor summary sheet for potential interferences. "Average response, can be longer with increasing concentrations of ammonium. "Typical performance across full temperature and pressure calibrated range. "Extended warranty option for sonde only (1 to 3 year extension for up to 5 years total). Specifications are subject to change without notice.
