

# Introduction to Environmental Awareness

## Level 1 (E-Learning)

**Ideal for:** All staff, particularly those new to their role and where a basic understanding of the environment is required.

**Duration:** 1 – 2 hours

### Course highlights

- Designed by a practicing environmental expert
- Understand the main types of pollution and its consequences
- Cost effective, flexible approach
- Learners can complete the course at their own pace through online modules
- Learn what your legal responsibilities are when dealing with waste
- Accessible to all and requires no previous knowledge of the environment
- Learners that complete the course will receive a downloadable certificate that can be held on personnel training records

### What will I learn?

This course is designed to help learners understand what the environment is and why it is important to protect it. Topics covered include the different types of pollution, how pollution is caused and why it is important to prevent it. As they work through the modules, learners will come to understand how reducing negative environmental impacts benefits our health and the economy. Finally, the course covers their legal responsibilities when dealing with waste and the consequences of ignoring them.

### Which topics are covered?

- What is the environment?
- What pollution is and the main types
- The costs of pollution to our health, the economy and the environment
- Environmental aspects and their impacts
- Waste, air and water management
- Legal responsibilities when dealing with waste and the consequences of ignoring them

### Benefits

- Flexible approach, where learners can complete the course at their own pace
- All delivered online, saving you money on travel, venue and material costs
- Interactive, engaging content that tests your knowledge
- No limit on how many employees can take the course
- Helps improve company environmental performance
